International Grid Conference in Bangkok

Consultants worldwide attend

Grid International recently conducted its 2010 Annual Conference, hosted by Grid International Thailand at The Imperial Queen's Park Hotel in Bangkok. The purpose of the conference was to communicate the new vision and direction of Grid International to its worldwide network of consultants. Participants came from all over the globe, including Australia, Austria, Brazil, Canada, China, India, Lebanon, Mexico, Thailand, and the United States. They listened to various aspects of the new vision and then participated in a variety of team activities to ensure understanding and commitment.

Grid Thailand also provided some fun and relaxing activities to complement all of the hard work, including a welcome cocktail reception and dinner at the hotel, as well as a farewell dinner cruise along the famous Chao Praya River. The conference was an unqualified success – all of the Grid consultants felt energized by the new vision and refreshed by their visit to exotic Bangkok.

Here are comments from some of the participants:

Teerachai Chemnasiri, Thailand: We had a good staff meeting this afternoon to discuss the new strategy introduced by Bruce and John and we found it the right strategy and so timely. The conclusion is so positive that everyone in the office likes this new methodology very much. Thanks to the tireless effort of Bruce and John for this new Business Model.

Patrícia S. Herrera Paes, Brazil: It is refreshing to get down to business with a new sense of direction and renovated belief.

The synergistic leadership put forward by John and Bruce will definitely inspire our work here, as well as guide us to take Grid to Brazil—which is a huge country and market that we are willing to conquer. We know it won't be easy, and we know that we can make it—with the help and assistance of GII.

Overcoming obstacles is a requirement to accomplishing great things!

Rudy Attems, Austria: When it comes to choices, whether to offer tailor-made process consultation or offer GRID interventions, we should be more confident and decisive in bringing our GRID intervening-process to the client

Oscar Morales, Mexico: And now we have a new strategy for implement in our countries, I wish the best for all us in this new journey. Thank you GII, Bruce, John and all the partner for his support.
